Results 1 - 3 of 3 short listing

1 Persistent structures to store moving images 87%

M. K. Zand , H. Farhat , H. Saiedian

Proceedings of the 1992 ACM/SIGAPP Symposium on Applied computing: technological challenges of the 1990's April 1992

2 The computation of optical flow 85%

S. S. Beauchemin , J. L. Barron

ACM Computing Surveys (CSUR) September 1995

Volume 27 Issue 3

Two-dimensional image motion is the projection of the three-dimensional motion of objects, relative to a visual sensor, onto its image plane. Sequences of time-ordered images allow the estimation of projected two-dimensional image motion as either instantaneous image velocities or discrete image displacements. These are usually called the optical flow field or the image velocity field. Provided that optical flow is a reliable approximation to two-dimensional ...

3 User modeling I: What would they think?: a computational model of 77%

attitudes

Hugo Liu , Pattie Maes

Proceedings of the 9th international conference on Intelligent user interface

January 2004

A key to improving at any task is frequent feedback from people whose opinions we care about: our family, friends, mentors, and the experts. However, such input is not usually available from the right people at the time it is needed most, and attaining a deep understanding of someone else's perspective requires immense effort. This paper introduces a technological solution. We present a novel method for automatically
